A cross-sectional view of a container assembly 30. The assembly includes a container body 31 with a tapered profile. A top layer 34 is positioned above the body, and a bottom layer 33 is positioned below it. A dashed line 35 indicates a horizontal boundary within the body. A hatched rectangular block 37 is located on top of the container. A hatched rectangular block 36 is located at the bottom of the container. A label 40 points to the top edge of the container body. An arrow points to the top right corner of the container body.
